SUMMARY

With 7+ years backend-end PHP experience with part of front-end experience and half year full stack experience, I am now looking for a full stack or front-end opportunity to learn and gain more experience on frameworks development.

I am a fast and keen learner with a good attention to details and excellent troubleshooting skills. I am also a good team player who has a proven ability to work analytically. I am highly efficient, deadline focused, and handle multiple projects at same time.

EXPERIENCE

Web Developer @ Devhub July 2016 - Present

- Build a new partial React.js website based on existing website (projectmate.com.au)
- Solely responsible for full stack development of multiply React.js/Rails apps (mealmonster.com.au, little-lion.net)

Architecture: React.js, Redux, Bootstrap, Rails, Sidekiq, Sendgrid, Stripe, Unit Testing

PHP Developer @ Agentbox June 2009 - July 2016

Agentbox CRM System

Agentbox CRM System is a leading CRM system to the Australian real estate industry. The system is built by PHP with procedure code. We moved to use Symfony 2 framework from the end of 2015 that make the code more reusable, readable and efficiency.

- Responsible for maintaining legacy business logical code
- Responsible for refactoring legacy business logical code into Symfony framework
- Responsible for developing new features/business logic with Symfony framework

Architecture: Symfony 2, MySQL, LAMP, Composer, Mootools, jQuery, AWS S3

Agentbox Go System

Agentbox GO System is a mobile and simplifies version of Agentbox CRM System. The system is built by PHP with object-oriented programming.

- Responsible for developing the system to migrate latest features from CRM system

Architecture: PHP, MySQL, LAMP, jQuery Mobile

Version Coordinator

- Responsible for reviewing the code of pull request
- Responsible for releasing new version to clients
- Responsible for maintaining and developing internal client management system

Other Ongoing Projects

Email Distributed System

When client requests sending emails, it will slice it into parts and distribute each part to different email servers by random, and call to send emails through centralized server on order.

Realestate Portals Export System

Exporting client's properties information with XML format, to portals, such as realestate.com.au, domain.com.au, and others.

Email Log Analysis System

It analyses email logs which receive from portals such as realestate.com.au and domain.com.au, and add results to the database, client requests to fetch data, and it will return JSON result to them.

Other scripts for ritual repeatable jobs

Write small scripts to replace human repeatable jobs, like to generate monthly reports

SKILLS

Expert in PHP with Symfony 2, HTML, CSS, Javascript

Advanced in Rails, SQL, React.js, jQuery, Mootools, Git, RESTful, SASS

Experienced in AWS, ES6, Babel, Bootstrap, XML, Unit Testing, Backbone, Coffeescript

EDUCATION

University of Wollongong — Master of Computer Science, 2007 - 2008

University of Wollongong — Bachelor of Computer Science, 2005 - 2007

INTERESTS

- Photography: my Instagram [[@ishotsth](https://www.instagram.com/ishotsth/)](<https://www.instagram.com/ishotsth/>)
- Traveling: view the world, and take photos
- Mobile/Desktop Applications: like to try new apps on both mobile or desktop
- Gadget: always like new gadgets
- Learning edge tech: keep learning and updating myself.
- Watching: like comedy and sci-fi
